Subject: Docket no . 09-RENEW E0-01

Categories: Ready to Docket

Commissioners,

As a person who regularly uses the desert when pursuing my rockhounding hobby, I was glad to see the in the latest DRCP draft that OHV and SRMA areas are declared as "rights-of-way exclusion areas for utility scale solar and wind development". The amount of land available for rockhounding has been decreasing steadily, as I am sure you know. I hope to be able to share my love of the outdoors, and the desert in particular with future generations. I strongly support continuing the "rights-of-way exclusion areas for utility scale solar and wind development."

Regards,

Steve
