Preliminary Conservation Strategy **Desert Renewable Energy Conservation Plan (DRECP)**

Prepared for:

California Energy Commission
1516 Ninth Street
Sacramento, CA 95814

Under Contract to:

Aspen Environmental Group
8801 Folsom Blvd., Suite 290
Sacramento, CA 95826
Contact: Tom Murphy

Prepared by:

DUDEK

DRECP Preliminary Conservation Strategy

TABLE OF CONTENTS

Chapter

- 1. EXECUTIVE SUMMARY**
 - 1.1 Purpose and Contents
 - 1.2 Relationship of PCS to Overall DRECP Development
- 2. CONSERVATION PLANNING**
 - 2.1 Preliminary Conservation Strategy Map
 - 2.2 Biological Goals and Objectives for the Preliminary Conservation Strategy
 - 2.2.1 Recommended Structure
 - 2.2.2 Working Examples
 - 2.2.3 Next Steps
 - 2.3 Reserve Design Process
- 3. BASELINE BIOLOGY UPDATE AND STATUS**
 - 3.1 Ecological Processes
 - 3.2 Natural Communities
 - 3.3 Covered Species List
 - 3.4 Species Profiles
 - 3.5 Covered Species Models
 - 3.5.1 Background
 - 3.5.2 Species and Habitat Model Selection
 - 3.5.3 GIS Data Layers for Species Model Development
 - 3.5.4 Modeling Process
 - 3.6 Gap Analysis
 - 3.6.1 Classification of Protection and Management Status (Gap Types 1–4)
 - 3.6.2 Existing Levels of Protection and Gaps
 - 3.7 Disturbed and Agricultural Lands Mapping
 - 3.7.1 Methods
 - 3.7.2 Analysis
 - 3.8 Incorporating Additional Data
 - 3.8.1 Current Additional Data Evaluation
- 4. DEVELOPMENT PLANNING**
 - 4.1 Renewable Energy Resource Data
 - 4.1.1 Resource Data Not Refined by Development Potential
 - 4.1.2 Resource Data Refined by Development Potential
 - 4.1.3 Transmission Planning

DRAFT

October 26, 2011

DRECP Preliminary Conservation Strategy

DRAFT TABLE OF CONTENTS (CONTINUED)

Chapter

- 4.1.4 Renewable Energy Resources Relative to the Preliminary Conservation Strategy Map
 - 4.2 Technology Mix and Development Planning Acreage Estimates
 - 4.3 Renewable Energy Study Areas
 - 5. PLAN INTEGRATION**
 - 5.1 Plan Structure
 - 5.2 Renewable Energy Study Areas Relative to the Preliminary Conservation Strategy Map
 - 5.3 Additional Planning Integration
 - 5.3.1 Comparison of the RESAs to Other Planning Initiatives
 - 5.3.2 Bureau and Land Management and Department of Energy Solar Energy Development Programmatic Environmental Impact Statement
 - 6. SUMMARY APPROACH TO SCIENCE INPUT FOR DRECP**
 - 6.1 Process for Soliciting Additional Expert Input
 - 6.2 Review by External Experts
 - 6.3 Scientific Review Workshop
 - 7. SUMMARY OF NEXT STEPS**
 - 8. REFERENCES CITED**
- #### **APPENDICES**
- A-1. Metadata for the Preliminary Conservation Strategy Map
 - A-2. Reserve Design Concepts and Tools
 - B. Species Profiles
 - C. Species Models
 - D. Proposed Covered and Planning Species List
 - E. Stakeholder Comment Matrix

DRAFT

DRECP Preliminary Conservation Strategy

LIST OF TABLES

- 2.1-1 Working Examples of Landscape-Level Biological Goals and Objectives
- 2.1-2 Selected Habitat Functions of DRECP Natural Communities that Support Primary Habitat for Covered Wildlife and Plant Species
- 2.1-3 Summary of Conservation Targets for Natural Communities
- 2.1-4 Working Examples of Natural Community-Level Biological Goals and Objectives
- 2.1-5 Working Examples of Species-Level Biological Goals and Objectives
- 2.2-1 DRECP Preliminary Conservation Strategy Map Description of Map Categories
- 2.2-2 Biological Elements and Data Layers Used to Depict Moderate to High Biological Value Areas for the Preliminary Conservation Strategy Map
- 2.2-3 Summary of the Preliminary Conservation Strategy Map by County
- 2.3-1 Optimization Function Calculation
- 3.3-1 Preliminary Conservation Strategy Covered Species List
- 3.3-2 Additional Proposed Covered Species
- 3.4-1 Covered Species Profiles: Review Summary
- 3.5-1 Status of Species Modeling for the Preliminary Conservation Strategy
- 3.6-1 Conservation Status Designation in the Plan Area
- 3.6-2 Gap Analysis of General Land Cover
- 3.6-3 Gap Analysis of Modeled Habitat
- 3.6-4 Gap Analysis of Species Occurrences
- 3.7-1 DRECP Disturbed and Agricultural Land Types
- 3.7-2 Disturbed and Agricultural Land Types by County within the DRECP
- 3.8-1 Additional Data Summary
- 4.1-1 Solar Resources within the Plan Area
- 4.1-2 Wind Resources in the Plan Area
- 4.1-3 Known Geothermal Resource Areas in the Plan Area
- 4.1-4 CEERT Identified Areas Suitable for Solar Development for Each County
- 4.1-5 Summary of Preliminary Conservation Strategy Map by CALWEA Wind Resource by County
- 4.1-6 Summary Table of Preliminary Conservation Strategy Map within Geothermal KGRAs by County
- 4.3-1 Areas Identified as Suitable for Solar Development within Renewable Energy Study Areas
- 4.3-2 Areas Identified as Suitable for Wind Development within Renewable Energy Study Areas
- 4.3-3 Areas Identified as Suitable for Geothermal Development within Renewable Energy Study Areas
- 5.2-1 Renewable Energy Study Areas by Preliminary Conservation Strategy Map Category
- 5.3-1 Comparative overlap of RETI Competitive Renewable Energy Zones and DRECP Renewable Energy Study Areas

DRECP Preliminary Conservation Strategy

LIST OF FIGURES

- 2-1 DRECP Preliminary Conservation Strategy Map
- 2-2A Process and Natural Community Elements
- 2-2B Desert Tortoise
- 2-2C Bighorn Sheep
- 2-2D Mohave Ground Squirrel
- 2-2E Narrow Range Species Elements
- 2-2F Composite of Biological Elements
- 2-3 Components of the Marxan Reserve Selection Tool
- 2-4 Sample DRECP Marxan Reserve Design Output
- 3-1 DRECP Initial Land Cover Map
- 3-2 Disturbed and Agricultural Lands
- 4-1 Solar Resources in the Plan Area
- 4-2 Wind Resources in the Plan Area
- 4-3 Geothermal Resources in the Plan Area
- 4-4 CEERT and LSA Solar Development Areas Map
- 4-5 CalWEA Priority Wind Development Areas Map
- 4-6 Approved Transmission Projects and Corridors in the Plan Area
