

To: CHRIS Beate :

Lived in the desert for 5 years. Later moved to Sonoma for 3 years. During which time I realized I should not have moved. I do not plan to move again. Never again.

The sunrise, the sun sets are out of this world. The night skies are beyond description. One can even enjoy a thunder storm and the lightning. Ever so beautiful is the rainbow after a rainfall.

Conservation is important, renewable energy is inevitable; but not on

- undisturbed land
- consideration to wildlife in the area
- no solar farms: <sup>ROOF TOP & PARKING LOT</sup> ACCEPTABLE.
- air quality and tranquility of our desert. Our water supply must not be AT RISK
- TOTAL TRANSPARENCY A Must

Very Concerned:
