Subject: DRECP NEPA/CEQA COMMENT

The **DRECP** will effect residents of desert communities and visitors alike. It affects nature lovers, naturalists, recreational users (i.e., hikers, campers), botanists, geologists, hydrologists and palaeontologists, among others. It affects the watershed, flora and fauna of fragile ecosystems that are unique to California. Many areas beloved to all of us are slated for closure. I would ask for the Mojave Desert and specific areas within its boundaries to be designated **NLSC (National Landscape Conservation System)** with an explicit exception for the current recreational use not be restricted. I am in favor of designating specific areas to be available for future energy development that does not impact the ecosystems and block the current recreational use.

Thank You,
Joe Ruff
