TN # 74922

FEB 23 2015

To: Chris Beale

As a resident of the Desert for the last 15 years I am appalled at the degradation of my community. I am President of Bighorn Desert View Water Agency and very concerned about the desert water tables with the advent of Solar and the water usage they use in our area!

1. The DRICP draft needs to be redrafted to meet the concerns of the Drought in California. The needs of the local community and wild life don't seem to be a concern.
2. I don't feel that the DRICP or the government is taking in to account the roof top solar i.e.: the total kW adding to the total of the goal of zero net energy to be achieved.
3. we need a durable and enforceable, long-term protection of our wildlife and human habitat.

4. We need landscape level planning, starting w/ local land use permits & county supervisors walking the area as well as state representatives & decision makers.
5. Why was the palm Springs wind mill area excluded? Why can't we use re:powering of the currently planted wind mills in the plan.
6. I want to protect sensitive lands & water producing areas - please see the attached noting my concerns.

Thank you

Judy Cori-Lorono
