Subject: DRECP NEPA/CEQA

California Energy Commission

DOCKETED

09-RENEW EO-1

TN # 75097

FEB 23 2015

I support inserting the following language into the revised Conservation and Management Action applicable to all DRECP areas:

"If existing designated vehicle routes are directly impacted by development or DRECP activities, including conservation actions (including modification of existing routes and restricted access or full closure of designated route to the public), mitigation shall include the development of alternative routes to allow for continued vehicular access, with similar recreation experience. In addition to continued access, mitigation shall include construction of an OHV touring route which circumvents any closed area and allows for directional and interpretative signs to be placed at strategic locations along the route."
