California Energy Commission

**DOCKETED**

**09-RENEW EO-1**

TN # 75098

FEB 23 2015

In a multi-thousand page document I find it more than somewhat disconcerting that only 108 pages are addressing the water issues. The future is all about water and one single line pertaining to subsidence seems more than an oversight.

In addition, you place the Fremont Valley in the low priority category and on page 74, state that there are zero existing renewable energy projects located in the Fremont Valley. The Beacon Project owned by LADWP exists and other current projects associated with LADWP are nearing approval. Needless to say, LADWP has its eyes on Fremont Valley and we have been fighting for 3 years against those who want to take over this valley and its water.

Other areas of the DRECP are of a concern to me, but I choose to address the water issues as they are, indeed, the greatest concern for future generations.
