DOCKETED

Please exclude Newberry Springs, CA from amongst the proposed 22.5 million acres of Reclamation Energy Projects in California.

The County of San Bernardino C-SB Position on DRECP recommends eliminating the DRECP from Newberry Springs, as well as other County of San Bernardino areas.

I challenge this proposed DRECP for all areas of California because several alternates, such as Roof-top and wind individual solutions have not been proposed, nor enacted.

There is absolutely no way that a thorough analysis could be possibly done on 22.5 million acres to protect and evaluate all the data.

This DRECP, as outlined, is not the best proposal, nor best solution.

JUST SAY NO.
