

Changes to the September 8, 2010 flowchart entitled *Proposed Process, Schedule, and Key Decision Points for the DRECP Plan* include:

- Moved some key decisions on the schedule
- Moved the Biological Baseline Report oval to the right so it was more accurately placed on the schedule.
- Added a “Covered Activities and Renewable Energy Needs” oval at the bottom to feed into the Regulatory Framework Report, thereby addressing stakeholder concerns that this issue needs to be addressed earlier.
- Clarified the conservation alternatives (purple box).
- Added more purple asterisks and green diamonds to indicate more incorporation of science advisors feedback and review.
- Clarified the “Other Issues Preliminary Description” so that recreation and cultural resources are highlighted.
- Refined the science advisor input legend.
