TN # 66865

AUG 20 2012

California Energy Commission
Dockets Office, MS-4
Docket No. 09-RENEW-EO-01

I'm with you on the utilization of wind and solar energy, however you must remember this, electricity takes the path of least resistance. The wind generators and the solar energy pannels can be built on the hill sides and valleys and the car people can go on with their, "hot rodding true heritage" at El Mirages, Munro Dry Lake. We are not born with big electric motors in our bodies, if we were we would have names like Johnny 5 Horses, or Suzg 3 Horses, or Jimmy 10 Horse.

You may consider the construction.

sites on hills and valleys challenging,
but you must remember "beauty is in
the eye of the beholder." the
hills and valleys will thank you and
the people will thank you.

Jim Robinson

Remember to keep the lights turned
off in the rooms you are not using.
